

## Classroom Activity 4

Draw a flowchart and write its pseudocode that adds / multiplies two numbers by the user.

### Classroom4

**Start program:** Multiply and add

**Declare**

num1, num2, M, add

**Print**("Enter number 1 and number 2")

**Get** num1, num2

M=num1\*num2

add=num1+num2

**print**("Multiplication answer is",M)

**print**("Addition answer is",add)

**End program**
