

## Classroom Activity 5

Draw a flowchart and write its pseudocode that divides two numbers given by the user (the first number is divided by the second number ).

### Classroom5

**Start program:** Division of numbers

**Declare**

num1, num2, Div

**Print** ("Enter number1 and number 2")

**Get** num1, num2

**Div=** num1/num2

**print**("The answer is", Div)

**End program**
